The Financial Planning Process

Every client's need and objectives are unique; therefore CHPW develops an investment plan that is tailored especially for each client and attempts to meet individual client goals and objectives. Strategies implemented will be within the risk parameters you have previously outlined to us.

When the plan is complete it will be formally presented to you, and will outline any recommended strategies and explain how they will assist in meeting your short and long term goals and objectives. The plan will also clarify any significant risks of investment strategies recommended, and include information concerning any fees, commissions and other benefits your financial adviser may receive for implementing the investments.

Once you agree to proceed with the recommendations made in the plan, your financial adviser will assist you with the completion of all necessary documentation and the purchase of investments. The investment details will then be entered into the CHPW database to enable us to review the progress of your portfolio.
